

April BOM 2020

Umbrella Sunbonnet "April Showers"

Start by choosing your background fabric cut a 5" square from background fabric.

This center square will be applique but raw edge will be the easiest, but you can use your favorite method (I fused my pieces in place first). I also fused iron-on interfacing on the back of the 5" square.

You can use scrap fabric for Sunbonnet. Choose 2 different small prints for her

dress and umbrella. Use solid white and black for the pieces. After cutting out the pieces using the templates below, arrange them like the picture centering it in the middle. Machine stitch in place.

Note: for the umbrella handle draw it in place then you can hand embroidery on using a running stitch or before stitching sunbonnet in place it can be done by machine.

After appliqueing is done trim the background square down to 4 h".
